

# Ultra Thin Trolley / Wall Cage Slate / Tablet / Netbook

**Product Codes: SN16, SN20, SN5, WD, FM2 or FM6, TK**

**SN16: Slate/Netbook Trolley/Wall Cage 16 Bay**  
**SN20: Slate/Netbook Trolley/Wall Cage 20 Bay**  
**SN5: Warranty Uplift to 5 Years total**  
**WD: (Auxiliary) Wall/Floor Dock**

**FM2: SN16 Floor Mount**  
**FM6: SN20 Floor Mount**  
**TK: Digital Timer Kit**

The flexible design of this kit will allow your new Slate/Tablet/Netbook securing system to evolve with your school and its requirements. Adjust from a portable Trolley to a fixed Wall Cage or Floor Mount, simply unbolt the handle and castors and screw it to a wall using the pre-drilled holes in the rear of the cage or using one of the accessories available mount the whole unit to the floor. With a total height of 840mm the trolley has been designed with a low centre of gravity.

To avoid theft and loss, being a cage style security system not only are the Slate/Tablet/Netbook secured but also the AC Adaptors.

To keep your Slate/Tablet/Netbooks cool during charging time strategically placed slots enable air to ventilate throughout the cage.

**Note: Two Padlocks will be required one to secure the trolley and one to secure the wall/floor dock.**

Available in **Red, Green, Blue** or **Orange**.

## Shipping Trolley/Wall Cage

The security system is shipped in a cardboard box with only the push handle requiring fitting via the pre-cut holes and supplied bolts.

Both options (Trolley & Wall Cage) come with all hardware and parts supplied to transform the Trolley to a Wall Cage and vice versa. This will future proof your classroom as both options can be retro fitted at a later date to allow for change in teaching techniques or classroom layout.

The system is supplied with two high quality Power Boards both with Surge Protection, RFI-Radio Frequency Interference, EFI-Electro-Magnetic Interference filters and 1.2m extension leads.

Charging bays measure HxWxD 355x 36x 360mm. The rear PVC Coated rail is depth adjustable this features reduces the requirement to reach all the way to the back to retrieve your device. Making this user friendly for Slate/Tablet/Netbooks all the way to iPads.

The 125mm non-marking soft grey rubber castors have convex shaped tires. The convex shape reduces the castor footprint, reducing friction and enabling easier movement on all surfaces including carpeted floors. The castors located at the Push Handle end have a large foot brake for securing the trolley on uneven surfaces.

If you choose to utilize this product as a Wall Cage but the mounting surface of your classroom are determined not sturdy enough to carry the weight of the Cage and Laptops. Or the wall contain Asbestos we have a **Floor Mount** accessory available. This option transfers all the weight direct to the floor but still using the same amount of classroom real-estate.

Another amazing feature of this system, it arrives standard with a “**Wall/Floor Dock**”. This dock has been designed to be fastened to a wall with access only required from the master side. Once installed the Trolley can be driven onto the Wall Dock (pad-locked) at the end of each teaching session or be permanently secured to the wall/floor if daily movement is not required. Additional Wall/floor Docks (order code **WD**) can be purchased for the trolley enabling it to be secured in a number of locations.

Accessories:

- Floor Mount
